

# Main Gate Operation

The Main Gate can be opened by residents in 4 different ways.

1. By remote control using a control device that has been properly programmed to activate the gate equipment. If you do not have such a device, contact Jo Hentschel who can assist. Many personal vehicles have built-in remotes that can also be programmed.
2. By Call Box on the drive-up pillar outside the gate. Using the proper #4 digit code, you can activate the gate opener. The code is usually changed once a year and all residents are notified accordingly. (Do not provide this code to anyone you do not know well.)
3. By home telephone authorization. When you press 9 on your handset, you will hear a tone and a hang-up. The gate will open for your visitor.
4. By Pedestrian Keypad which is located on the inside far left gate pillar. Enter the 4 digit code and press Enter.

Note: The Postal Service, UPS, FedEx, etc. have been given a special code for entry. They should call their office if they do not have the code.

Pedestrian Keypad
